Indianapolis, IN 46242

Re: 111-13631
First Minor Permit Revision to
FESOP 079-9252-05164

Dear Ron Terrell:

Milestone Contractors, L.P. was issued a permit on April 14, 1998, for operation of a portable counterflow drum hot mix asphalt plant with a maximum production capacity of 440 tons per hour. A letter requesting changes to this permit was received on December 18, 2000. Pursuant to the provisions of 326 IAC 2-8-11.1 a minor permit revision to this permit is hereby approved as described in the attached Technical Support Document.

The modification consists of changes in the fuel usage limits from a 365-day period to a twelve (12) consecutive month period and in the corresponding reporting requirements.

Pursuant to 326 IAC 2-8-11.1, this permit shall be revised by incorporating the minor permit revision into the permit. All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this modification and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Gurinder Saini, OAM, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call at (800) 451-6027, press 0 and ask for Gurinder Saini or extension 3-0203, or dial (317) 233-0203.

Sincerely,

Paul Dubenetzky, Chief
Permits Branch
Office of Air Management

FEDERALLY ENFORCEABLE STATE OPERATING PERMIT (FESOP) OFFICE OF AIR MANAGEMENT

Milestone Contractors, L.P. (Portable)

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-8 and 326 IAC 2-1-3.2, as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: F079-9252-05164	
Issued by: Paul Dubenetzky, Branch Chief Office of Air Management	Issuance Date: April 14, 1998
First Minor Permit Revision: F111-13631-05164	Pages Affected: 32, 33, 41-44
Issued by: Paul Dubenetzky, Branch Chief Office of Air Management	Issuance Date:

- (7) one (1) 1.2 million Btu per hour heat input capacity number two distillate fuel oil fired nonproduction generator set, identified as number nineteen, exhausting to stack S-8;
- (8) two (2) asphalt storage tanks, each with 30,000 gallon capacities, identified as numbers fifteen and sixteen, venting at V-4 and V-5; and
- (9) one (1) 20,000 gallon capacity fuel storage tank, identified as number seventeen, venting at V-6

Emission Limitations and Standards [326 IAC 2-8-4 (1)]

D.1.1 Sulfur Dioxide (SO₂)

Pursuant to 326 IAC 7-1.1-2 (Sulfur Dioxide Emission Limitations):

- (a) the input of waste oil to the asphalt drum burner shall be limited to 1,650,226 gallons of waste oil per 12 month period, rolled on a monthly basis;
- (b) the percent of sulfur in the waste oil to be combusted shall not exceed 0.75% sulfur content by weight;
- (c) the percent of sulfur in the #2 distillate fuel oil to be combusted shall not exceed 0.5% sulfur content by weight;
- (d) for purpose of determining compliance, every 1000 gallons of #2 distillate fuel oil burned shall be equivalent to 644 gallons of waste oil based on SO₂ emissions;
- (e) during the first 365 days of operation under this permit, the input of waste oil and waste oil equivalent (#2 distillate) to the asphalt drum burner shall be limited such that the total gallons divided by the accumulated days of operation shall not exceed 4521 gallons per day;
- (f) the input of #2 distillate oil to the two (2) generators shall be limited to 175,000 gallons of #2 distillate per 12 month period, rolled on a monthly basis; and
- (g) during the first 365 days of operation under this permit, the input of #2 distillate fuel oil to the two (2) generators shall be limited such that the total gallons divided by the accumulated days of operation shall not exceed 479 gallons per day.

These fuel usage and content limitations are equivalent to a total sulfur dioxide emissions of 99 tons per 12 month period, rolled on a monthly basis. The federally enforceable limit on the potential to emit sulfur dioxide (SO₂) shall truncate the potential to emit oxides of nitrogen (NO_x) proportionately to less than 100 tons per year. Therefore, 326 IAC 7-1.1 (Sulfur Dioxide limitations), 326 IAC 2-3 (Emission Offset rules), and the Part 70 Permit Program (326 IAC 2-7) rules do not apply.

D.1.2 Waste Oil Combustion

The waste oil burned in the asphalt drum burner shall comply with the used oil requirements specified in 329 IAC 13 (Used Oil Management). Pursuant to 329 IAC 13-3-2 (Used Oil Specifications), used oil burned for energy recovery that is classified as off-specification used oil fuel shall comply with the provisions of 329 IAC 13-8 (Used Oil Burners Who Burn Off-specification Used Oil For Energy Recovery), including:

- (a) Receipt of an EPA identification number as outlined in 329 IAC 13-8-3 (Notification),
- (b) Compliance with the used oil storage requirements specified in 329 IAC 13-8-5 (Used Oil Storage), and
- (c) Maintaining records pursuant to 329 IAC 13-8-6 (Tracking).

The burning of mixtures of used oil and hazardous waste that is regulated under 329 IAC 3.1 is prohibited at this source.

D.1.3 Particulate Matter (PM) [326 IAC 6-1-2]

Pursuant to 326 IAC 6-1-2 (Nonattainment Area Particulate Limitations), particulate matter emissions from the asphalt drum mixer and burner shall not exceed 0.03 grains per dry standard cubic foot (gr/dscf). This emission limitation is equivalent to 14.98 pounds per hour.

D.1.4 Particulate Matter (PM) [326 IAC 12]

Pursuant to New Source Performance Standards, 326 IAC 12 (40 CFR 60.90 to 60.93, Subpart I):

- (a) particulate matter emissions from the asphalt drum mixer and burner shall not exceed 0.04 grains per dry standard cubic foot (gr/dscf); and
- (b) the visible emissions from the plant shall not exceed 20 percent opacity.

This emission limitation is equivalent to 19.97 pounds per hour.

D.1.5 Particulate Matter (PM-10) [326 IAC 2-8]

Pursuant to 326 IAC 2-8 the potential to emit PM-10 from the asphalt drum mixer and burner shall be limited to:

- (a) 59.48 tons per twelve (12) month period; and
- (b) 13.58 pounds per hour.

The total source PM-10 emissions are limited at 99 tons per year. These PM-10 limitations are equivalent to 2,428,360 tons of asphalt concrete produced per 12 month period, rolled on a monthly basis. During the first 365 days of operation, the asphalt concrete production shall be limited such that the total production divided by the accumulated days of operation shall not exceed 6653 tons per day. Due to the above limit, the Part 70 rules (326 IAC 2-7) do not apply.

D.1.6 Volatile Organic Compounds (VOC)

The VOC emitted from the production of cold mix (stockpile mix) asphalt shall be limited to 93.26 tons per 12 month period, rolled on a monthly basis. This is equivalent to 98.16 tons of diluent used per 12 month period in the production of asphalt based on 95% volatilization. During the first 365 days of operation, the diluent usage shall be limited such that the total usage divided by the accumulated days of operation shall not exceed 537 pounds per day. Therefore, 326 IAC 2-3 (Emission Offset) and the Part 70 rules (326 IAC 2-7) do not apply.

D.1.7 Volatile Organic Compounds (VOC) [326 IAC 8-5-2]

Pursuant to 326 IAC 8-5-2 (Miscellaneous Operations: Asphalt Paving), no person shall cause or allow the use of cutback asphalt or asphalt emulsion containing more than seven percent (7%) oil distillate by volume of emulsion for any paving application except:

Indiana Department of Environmental Management Office of Air Management

Technical Support Document (TSD) for a Minor Permit Revision to a Federally Enforceable State Operating Permit

Source Background and Description

Source Name:	Milestone Contractors, L.p.
Source Location:	235 E.US Highway 24, Kentland, IN 47951
County:	Newton
SIC Code:	2951
Operation Permit No.:	079-9252-05164
Operation Permit Issuance Date:	April 14, 1998
First Minor Permit Revision No.:	111-13631-05164
Permit Reviewer:	Gurinder Saini

The Office of Air Management (OAM) has reviewed a revision application from Milestone Contractors, L.p. relating to the operation of a portable counterflow drum hot mix asphalt plant with a maximum production capacity of 440 tons per hour.

History

On December 18, 2000 Milestone Contractors L.p. submitted an application to the OAM requesting to modify the monthly reporting form for fuel usage. Milestone Contractors, L.p. was issued a FESOP on April 14, 1998.

Enforcement Issue

There are no enforcement actions pending.

Permit Changes

The Permittee has requested to replace the language "365 day rolling total" for fuel usage with "12 month rolling total" for monitoring and record keeping requirements and forms. The OAM has agreed to revise the permit as follows (with language added shown in **bold** and deleted with ~~strikeout~~):

1. The condition D.1.1 in the section D.1 is revised as follows:

D.1.1 Sulfur Dioxide (SO₂)

Pursuant to 326 IAC 7-1.1-2 (Sulfur Dioxide Emission Limitations):

- (b) the input of waste oil to the asphalt drum burner shall be limited to 1,650,226 gallons of waste oil per ~~365-day period, rolled on a daily basis~~ **12 month period, rolled on a monthly basis**;
- (c) the percent of sulfur in the waste oil to be combusted shall not exceed 0.75% sulfur content by weight;

- (d) the percent of sulfur in the #2 distillate fuel oil to be combusted shall not exceed 0.5% sulfur content by weight;
- (e) for purpose of determining compliance, every 1000 gallons of #2 distillate fuel oil burned shall be equivalent to 644 gallons of waste oil based on SO₂ emissions;
- (f) during the first 365 days of operation under this permit, the input of waste oil and waste oil equivalent (#2 distillate) to the asphalt drum burner shall be limited such that the total gallons divided by the accumulated days of operation shall not exceed 4521 gallons per day;
- (g) the input of #2 distillate oil to the two (2) generators shall be limited to 175,000 gallons of #2 distillate per ~~365 day period, rolled on monthly basis~~ **12 month period, rolled on a monthly basis**; and
- (h) during the first 365 days of operation under this permit, the input of #2 distillate fuel oil to the two (2) generators shall be limited such that the total gallons divided by the accumulated days of operation shall not exceed 479 gallons per day.

These fuel usage and content limitations are equivalent to a total sulfur dioxide emissions of 99 tons per ~~365 day period, rolled on a daily basis~~ **12 month period, rolled on a monthly basis**. The federally enforceable limit on the potential to emit sulfur dioxide (SO₂) shall truncate the potential to emit oxides of nitrogen (NOx) proportionately to less than 100 tons per year. Therefore, 326 IAC 7-1.1 (Sulfur Dioxide limitations), 326 IAC 2-3 (Emission Offset rules), and the Part 70 Permit Program (326 IAC 2-7) rules do not apply.

2. The condition D.1.5 is revised as follows:

D.1.5 Particulate Matter (PM-10) [326 IAC 2-8]

Pursuant to 326 IAC 2-8 the potential to emit PM-10 from the asphalt drum mixer and burner shall be limited to:

- (a) 59.48 tons per ~~three hundred sixty-five (365) consecutive day~~ **twelve (12) month** period; and
- (b) 13.58 pounds per hour.

The total source PM-10 emissions are limited at 99 tons per year. These PM-10 limitations are equivalent to 2,428,360 tons of asphalt concrete produced per ~~365 day period, rolled on a daily basis~~ **12 month period, rolled on a monthly basis**. During the first 365 days of operation, the asphalt concrete production shall be limited such that the total production divided by the accumulated days of operation shall not exceed 6653 tons per day. Due to the above limit, the Part 70 rules (326 IAC 2-7) do not apply.

3. The condition D.1.6 is revised as follows:

D.1.6 Volatile Organic Compounds (VOC)

The VOC emitted from the production of cold mix (stockpile mix) asphalt shall be limited to 93.26 tons per ~~365 day period, rolled on a daily basis~~ **12 month period, rolled on a monthly basis**. This is equivalent to 98.16 tons of diluent used per ~~365 day~~ **12 month** period in the production of asphalt based on 95% volatilization. During the first 365 days of operation, the diluent usage shall be limited such that the total usage divided by the accumulated days of operation shall not exceed 537 pounds per day. Therefore, 326 IAC 2-3 (Emission Offset) and the Part 70 rules (326 IAC 2-7) do not apply.

4. The FESOP Quarterly Reporting forms on page 41-44 of the permit are replaced by FESOP Quarterly Reporting form as shown on the following pages:

Recommendation

The staff recommends to the Commissioner that the Minor Permit Revision be approved. This recommendation is based on the following facts and conditions:

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant.

An application for the purposes of this review was received on December 18, 2000

Emission Calculations

No emission calculations are required.

Justification for Revision

The Federally Enforceable State Operating Permit is being modified through a FESOP Minor Permit Revision. This revision is being performed pursuant to 326 IAC 2-8-11.1(d) (1) "...modifications that reduce the frequency of any monitoring or reporting required by a permit condition or applicable requirement.

Conclusion

This permit revision shall be subject to the conditions of the attached proposed FESOP Permit Revision No. 111-13631-05164.
